

## Networks Special Issue: "Recent Advances in Network Optimization"

This special issue of Networks invites high-quality and innovative submissions that focus on network optimization methods arising, for example, in logistics, routing, transportation, and network design. All contributions will be peer reviewed according to the usual standards of the journal.

This special issue celebrates the 33rd European Conference on Operational Research (EURO) 2024 in Copenhagen, Denmark; participants of EURO 2024 are encouraged to submit relevant work to this special issue. This call for papers is also open to the entire community of academics and practitioners working in the field of Network Optimization Methods.

Deadline for submission: October 31st, 2024.

Expected publication date: June 2025.

Guest editors: Claudia Archetti ([archetti@essec.edu](mailto:archetti@essec.edu)) and Luis Gouveia ([legouveia@fc.ul.pt](mailto:legouveia@fc.ul.pt)).
